Code of Conduct

I have developed this code of conduct (adapted from the [original version here](#)) in order to create a safe and welcoming environment for all R learners. I have done this for two reasons:

1. A large part of my mission with R for the Rest of Us is to bring R to those who have not yet been exposed to it, including those of diverse backgrounds. Creating an environment where all feel welcome is essential to this.
2. Learning to code is challenging. Being able to openly share code with others without fear of demeaning responses is key to making progress.

With this in mind, all R for the Rest of Us participants are required to agree with the following code of conduct. I expect cooperation from all participants to help ensure a safe environment for everybody.

Need Help? Please email me at david@rfortherestofus.com.

I am dedicated to providing a harassment-free experience for everyone, regardless of gender, gender identity and expression, age, sexual orientation, disability, physical appearance, body size, race, ethnicity, religion (or lack thereof), or technology choices. I do not tolerate harassment of other students in any form. Sexual language and imagery is not appropriate. Participants violating these rules may be sanctioned or expelled from the group and/or workshops they are signed up for without a refund.

Harassment includes offensive verbal comments related to gender, gender identity and expression, age, sexual orientation, disability, physical appearance, body size, race, ethnicity, religion, technology choices, sexual images in public spaces, deliberate intimidation, stalking, following, and unwelcome sexual

Course Materials

The screenshot shows a web-based course platform interface. At the top, there's a navigation bar with links for Courses, Resources, Custom Training, Consulting, Blog, and Contact. On the right side of the nav bar are icons for search, video, notifications, and a shopping cart with one item. A user profile for Charlie Hadley is also visible.

The main content area features a large banner with a dark purple, cellular background pattern. Overlaid on the banner is the title "R in 3 Months (Fall 2022)" in a large, white, sans-serif font. Below the title is a "View Course details" button. To the right of the banner is a blue callout box containing the course title again and the subtitle "R for the Rest of Us". A blue hexagonal logo is in the bottom right corner of the callout. A large blue button labeled "Start Course" is positioned below the callout.

Below the banner, a progress bar indicates "0% Complete". It includes a small orange icon and the text "Last activity on August 22, 2022".

A message from the course instructor follows:

Thanks for joining us for the 4th edition of R in 3 Months. We're really excited to have you on the course and to see what you end up building with R. Creating a safe space for everyone to learn R is essential to R in 3 Months. Please review and ensure that you agree with the code of conduct. Here are some links you'll use throughout our time together:

- A list of all participants can be found [here](#).

Project Assignments

- Something you will work on throughout the three months you work together
- Can be something you're working now or something you've done before
- To apply what you learn at your project you will need a database that you can share with us.
- Best if you have some final output you can work toward to have ready for 3 months together

Advice on projects & datasets

If you can't share your datasets or don't have any you could try looking at [tidy Tuesday datasets](#).

Project Assignment Feedback

You'll share progress most weeks and get feedback via video from Barrie.

Project Assignment Submission

Live Sessions

Thursdays at 10:00am Pacific time

- Answer questions
- Live coding
- Group exercises
- And more!

Sessions will be recorded and made available within 48 hours

Drop-in Sessions / Office Hours

Tuesdays at 2:00 PM Pacific time

- Charlie available for any questions
- They will be recorded and made available

Weekly Plan

Thursday

- Live session

Friday

- Live session video posted
- Summary email sent out

Monday

- Reminder mail sent out

Tuesday

- Office hours 2:00 p.m. Pacific time
- Complete lessons and post any questions
- Complete project assignment

Getting Started Questions

Next Week

R Markdown

R's killer feature!

Course Assignment

- If you have questions specific to the lesson, post them below the lesson.
- If you have more general questions, post them in the GitHub discussion forum in the QA category.

Project Assignment

- Write the introduction of your project in Markdown
- Create a GitHub account
- Post your code [as a gist](#)
- Charlie will give you feedback
